

Delta Spa

Steam Bath & Sauna Control from One Device

Delta Spa

The latest innovation from Condair allows for simultaneous control of Steam Baths, Caldarium, Rasul and different Sauna variants such as Bio and Finnish saunas.

The Delta Spa enables users to control every component required to operate a steam bath via one device. Components such as Steam Generators, Lights, Fragrance Pumps, Supply, and Exhaust Fans, and more.

Condair understands that individuals are unique. This is why every steam bath can be tailored to each individual's preferences via a modern touch display user interface. It even allows individuals to simultaneously control both a steam bath and sauna cabin completely independently of each other.

Advantages:

- Easy switch between steam bath and sauna on the display.
- Flexible number of displays, one for both cabins or one for each cabin.
- External touch display
- Keepwarm function saves energy

As an added benefit, the display can even be customized to include the individual's logo and company details on the touchscreen interface.

Additionally, energy saving cabins can be kept in a keep warm mode during standby operation, so they only heat up to setpoint when a guest is using the cabin.

The external display in three versions

The following connections are possible:

- 2 x Fan
- 2 x Light
- Open Door Sensor
- 2 x Potential-free relay contact
- 2 x Start-/Stop button
- 2 x Temperature sensor
- 1 x Emergency stop
- 1 x Humidity sensor
- 1 x Bench heating
- 1 x Wall heating

Technical data

Condair Spa Control Delta Box		
Nominal power	Bench heating	1 kW
	Wall heating	1 kW
	Accessoires	1 kW
Dimensions (W x H x D)	13 7/8" x 13 7/8" x 4 1/5"	
Net weight	12.12lbs
